

Monday

We did maths, we asked the other classes some questions about a new playground game. We collected the data and added the totals together, to find the most common answer, from this we were able to work what type of game to design.

After lunch we transferred the data to graphs on the computer. It was very fun. Once we had done the charts we had to make up a game for everybody. Also we had to write the rules for the game.

Tuesday

We started the day by finishing off the game and completing the rules. After break we began cooking our own lunch in the kitchen, we chose to cook homemade burgers with bacon, salad and of course tomato sauce! Followed by, rice krispie cakes, some with sultanas in, yum yum. After lunch we did P.E and it definitely wore us out. Lots of running and star jumps but in the end it was worth it because we had a dodgeball match.

Wednesday

Today we have been thinking about the Olympic values, Determination, Friendship, Excellence, Respect, Inspiration, Courage and Equality. Taking photographs to represent a value that will be sent to a competition.

Jack, Josh, Jack, Reeza and Stefan.
